PROFESSIONAL SUMMARY

B.Tech graduate in Artificial Intelligence and Data Science with internship experience in Python development, database and workflow development, data processing, and analysis. Skilled in Python, SQL, Git/GitHub. Strong analytical and problem-solving skills with experience developing automation scripts, managing databases, and working with structured datasets. Seeking an entry-level Analyst role focused on data delivery, processing, quality checks, and technology modernization.

EDUCATION

Saveetha Institute of Medical and Technical Sciences 2022-2026
Bachelor of Technology in Artificial Intelligence and Data Science
CGPA: 8.4/10

TECHNICAL SKILLS & INTERESTS

Programming Languages: Python, SQL, R
API & Development Tools: REST APIs, Postman, Git, GitHub
Certifications: HackerRank Python (Basic), Oracle Cloud Infrastructure 2025 Data Science Professional, CTIA (EC-Council), R Programming Bootcamp (Udemy)
Soft Skills: Problem Solving, Analytical Thinking, Communication, Team Collaboration

EXPERIENCE

AUTOMETRY TECHNOLOGIES PVT LTD, Chennai Nov 2025 – Jan 2026
Database & Workflow Development Intern

- Developed an Expense Tracking & Approval Workflow Database to streamline financial approval processes.
- Designed database structures for efficient storage, retrieval, and management of expense records.
- Worked with structured data and database workflows to support accurate processing of expense information.
- Performed data validation and checks to maintain consistency and accuracy of stored records.

INNOBYTE SERVICES (Remote) May 2025 – Jul 2025
Python Developer Intern

- Developed and tested Python automation scripts using object-oriented principles, including manual verification of script outputs against expected results.
- Performed data cleaning, validation, and visualization using Pandas, NumPy, and Matplotlib, identifying and resolving data quality issues.

PROJECTS

News Article Summarizer — Python, Flask, NLP

- Built a Flask web app that extracts articles from URLs and generates summaries using NLP; manually tested extraction and summarization logic across varied article formats to validate accuracy.
- **Tech Stack:** Python, Flask, HTML, CSS, JavaScript, NLP, Git, GitHub, Render

BloodBuddy — Mobile Health Recommendation Application

- Developed a mobile app for personalized food recommendations based on user health profiles; performed functional testing of authentication and recommendation modules before release.
- **Tech Stack:** Android Studio, Java, Core PHP, MySQL, XAMPP

Greenhouse Gas Emission Analysis in Aviation — Machine Learning

- Built and evaluated ML models to forecast aviation emission trends.
- **Tech Stack:** Python, Pandas, NumPy, Scikit-learn, TensorFlow/Keras, Matplotlib
